Profile & Objective

With experience at *Jellyfish* creating Crowds and fixing Animation and Lighting shots for *How to Train Your Dragon: Homecoming*. I am now looking for a job in an innovative studio that can help me to further develop my niche skills. In the past I have worked with 2 mini-enterprises as designer and created many works on request. I understand the effort required to achieve a great result.

Technical Skills

Education

2016 – 2019: BA in 3D Animation and Modeling, University Of Hertfordshire:

Animated Thinking: Histories Theories, Contexts: an insight into the tools needed to critically analyse & engage a range of animated media, from films, shorts, games & visual effects.

CG Practices and Techniques: This module introduces and develops an understanding of the underlying concepts of computer animation both 3D and 2D.

Digital Art: A variety of two-dimensional digital art techniques relevant to the animation, games and visual effects fields. These include life drawing, digital painting and photography.

Creativity, Concept and Story: Effective communication through an understanding of narrative construction, composition, colour and character and environment design.

Moving Image: Explores time-based digital media technologies such as editing and sound using group dynamics, collaboration and organisational strategies.

2010 - 2016 Collège Don Bosco, Woluwe St Lambert, Belgium
